

// Momenta™ Motorization App Honeycomb Shades and Window Shadings

Essex Sales &
Distribution Group, Inc.
Your Premier Window Covering Supplier

With the use of the Momenta™ Bridge and App, you can raise/lower and position shades using a smart device or create, schedule, and customize scenes so that designated shades can operate on their own at programmed times.

Scenes can be created with different combination of shades in each room and adjusted to various chosen positions at specific times of the day. This allows perfect control of light for privacy, security and overall room ambiance.

- Available on iPad®, iPhone®, or iPod Touch® iOS 6 or later (Android available at a later date)
 - Search “Momenta Shade Remote” on the App store and install the App
- Compatible with Shades ordered with RemoteLift 2.0 (shades ordered in 2013 forward)
 - Honeycomb Shades and Window Shadings

Important note: Please be aware that the app features motorized Roller Shades as well as motorized Cellular Top-Down/Bottom-Up, Day/Night, and Skylight shades which are currently not available at this time. We do offer motorized Cellular Top-Down shades. These can be controlled by utilizing the standard shade configuration. Controls simply work opposite of standard.

Benefits

- Shades can be operated individually, by group or throughout the home any time of the day.
- Timer feature sets the shades to open or close...day or night...all week long.
- Precisely controls the light in every room through the use of scenes, group controls and timed events.
- Easy Installation
- Extremely Responsive
